

Cyber Security Services

A Dangerous New World

Attacks on businesses have become relentless over the first quarter of 2024 with a significant increase of 28% [1]. It isn't a matter of if, it's when and Truis are here to help.

Strengthen your Cyber Security with Truis

Many businesses struggle to keep up to date and implement the latest in cyber security measure that are essential in keeping them safe. At Truis, we make it simple by building a strong partnership with your organisation and finding the right fit to sure up your cyber security environment.

With 40 years of IT experience, working with some of the worlds leading brands; Truis are ready to help find the gaps in your cyber security strategy and assist in building a solution that makes complete sense for your organisation.

Our Secure Approach

Guaranteed Peace of Mind

Your protection is being monitored and actioned on your behalf – as and when it happens, removing costly downtime and keeping business critical systems up and running.

Speed of Action

Truis works fast to respond and take action to potential threats, from isolating a corrupted device to protect the rest of the environment to stopping services and removing affected files.

Overarching Support and Visibility

We'll take a big picture view of what's going on in your systems to prevent potential breaches and identify vulnerabilities.

Automated Remediation

Threat detection is powered by AI, which can quickly analyse large amounts of risk data for rapid response times.

Full Service

Managing every aspect of your security services and providing threat and incident reports.

Truis Security Solutions

Security Assessment & Consulting

A robust security strategy starts with support and planning from leaders in the industry. Truis have partnered with a range of technical security partners, geared at aligning your business needs with industry standard requirements. We generally begin with an assessment to align your business needs with the level of security required to stay compliant.

Security Awareness Training

One click could cost your business. But training your staff in the right protocols can be the last line of human defense against phishing attacks. Truis have partnered with a wide range of security awareness training vendors to keep your staff and business security savvy.

SOCaaS

Your systems can produce an overwhelming amount of data. From firewalls, anti-virus and threat detection, Security operations can help piece together insights from your systems and give actionable methods to safeguarding your systems.

Penetration Testing

With growing concern of data protection sweeping the globe, Truis have partnered with leading security to deliver penetration tests. Get in touch with us to close those gaps in your environment today.

DRaaS

Be proactive and plan for emergencies with our DRaaS. In the face of disruptions, DRaaS can keep your systems securely backed up and ready to be restored at any time. This service can provide you peace of mind by ensuring you have a fast recovery plan.
