

IBM Power Solution Bundle

Where Efficiency Meets Excellence

CUT THE DOWNTIME AND CUT THE COSTS: Optimised efficiency is not a luxury in today's competitive business environment but is necessary. By leveraging the formidable IBM Power Systems, Truis offers unparalleled support and crafts a bespoke solution designed for your unique needs. With Truis, you don't just streamline operations – you redefine them. Experience the Truis advantage: where IBM's power meets our commitment to excellence. Ensure your business is always ahead and always efficient.

At Truis, we've harnessed the full potential of robust IBM Power Systems and combined them with our top-notch support services. The result? A tailored solution that seamlessly keeps your systems running, empowering you to conquer your business goals with unwavering confidence.

Say goodbye to IT headaches and embrace the future of streamlined productivity where innovation meets efficiency.

IBM Power Systems: Our Domain of Expertise

Truis has been deeply immersed in the vast potential of IBM Power Systems for over four decades. Our recognition as IBM's Infrastructure Partner of the Year in 2019 underscores our profound expertise.

Rather than just providing services, our approach is rooted in an intricate understanding of IBM Power Systems. Collaborating with you, we focus on detailed technical specifications to ensure seamless migrations and installations, whether it's new solutions or upgrading existing IBM Power configurations.

Experience the Truis difference: Where unparalleled potential converges with meticulous expertise to ensure your business excels.

Truis Your Trusty IT Partner

At Truis, we offer more than run-of-the-mill support – we deliver a compelling partnership. Our true value lies in an unwavering commitment to providing you and your users with the ultimate experience. From round-the-clock 24x7 support to tailor-made solutions that align perfectly with your budget, we become your trusted IT partner, primed to conquer any challenge that comes your way.

Tailoring Your IBM Power Bundle

Before the world of IBM Power Bundles, take a moment to reflect on what your perfect solution entails:

ASSESS YOUR NEEDS:

Understand your unique requirements, whether you require basic support or advanced features.

SCALABILITY MATTERS:

Consider your business's future growth and opt for a bundle that adapts and scales seamlessly to your evolving needs.

EXPERTISE COUNTS:

For 40 years, we've mastered IBM Power Systems. As IBM's 2019 Infrastructure Partner of the Year, we don't just endorse; we operate on IBM's foundation. Our certifications include IBM Power Systems Servers (Power5 to Power9), SAN Storage, AIX and i Operating Systems, PowerVM, and PowerHA. Trust in our recognized expertise; with IBM at our core, your business is in expert hands.

BUDGET AND COST SAVINGS:

Consolidate with our bundles for cost-effective system support and maintenance. Assess the financial benefits and capitalise on enhanced deals and proactive upkeep.

RANGE OF SERVICES:

Our service package bundles cover the full spectrum, from asset management to monitoring, backups, and disaster recovery, tailored to meet your business requirements.

The Truis Advantage

Unlock cost-effective solutions and simplified operations with dedicated support, allowing seamless business expansion and empowering your business with advanced features.

Dedicated Customer Support: 24x7 Assurance

Benefit from the expertise of our engineers available around the clock. With Truis, you're not just getting support; you're getting dedicated 24x7 and on-call assistance, ensuring swift resolution of any technical challenges that may emerge. Experience the commitment and precision that sets Truis apart.

Business Expansion and Scalability

Truis adapts to your changing needs as your business evolves and expands. Our bundled services facilitate quick and efficient setup in new locations or markets, ensuring a smooth transition without the need to deal with multiple vendors.

Advanced Service Management and Transparency

Our packages often include advanced features like backup management, patching and firmware updates, capacity planning, and multipartition replication. These additional offerings empower your business with enhanced capabilities and robust IT infrastructure.

IBM Mastery at Truis: A 40-Year Legacy

For four decades, our award-winning team hasn't just advocated for IBM Power; we've built our business on it. From strategic design to 24/7 unparalleled support, our IBM-certified experts and architects are the embodiment of technical prowess across Power Systems, SAN Storage, and pivotal IBM Operating Systems. Trust in Truis for complete IBM mastery.

Truis is here for your IBM Journey.

Are you facing challenges with your IBM systems? Let's address them together. Our IBM-certified experts are ready to tailor solutions fitting your business needs and budget. From initial consultations to continuous support and adept technology deployment, we align with your objectives.

“I have been in the IT industry for over forty years, almost all of that with IBM hardware and software in several different environments. I am nearing my retirement, but I do not want to leave the company that I am working for without support. I see Truis as the backup to my successor to provide this support.”

Wayne Millow
AS400 Systems Manager
